

RHM60L

Coriolis Mass Flow Meter With Uncompromising Performance

Features

- Standard pressure ratings up to 490 bar (7107 psi)
- Temperature ratings from -196 to 350°C (-320 to 662°F)
- Mass flow uncertainty down to 0.15%
- Density uncertainty down to 0.5%
- Repeatability better than 0.05%
- Typical measuring ranges between 3000 and 60 kg/min
- Accurately measure low flow rates down to 45 kg/min
- Unique robust torsion driven oscillation system
- Rheonik **AnyPipeFit Commitment** brings you the possibility to get any custom process connection type and size for savings on installation costs. Compact design with minimal footprint
- Approved for use in hazardous areas
- Stainless steel case

Applications

- Plant Balance
- Terminal Transfer
- Asphalt/Bitumen and other High Temperature Fluids
- Viscous Fluids
- Reactor Charging
- Batching
- Barge, Ship, Rail Car and Truck Filling

Rheonik Sensor Benefits

- Torsion oscillator design assures a stable and drift free measurement with excellent signal to noise ratios
- Resilient to external noise and vibration
- Insensitive to pipe pressure changes
- Robust tube wall thickness provides increased operational safety in abrasive applications
- Corrosion resistant
- Long sensor life guaranteed due to low mechanical stresses in the meter mechanism
- No moving parts to wear or fail

General Specification Overview

Nominal Flow (Q_{nom})*	3000 kg/min (6614 lb/min)
Minimum Flow (Q_{min})*	60 kg/min (132.3 lb/min)
Operating Temperature	Fluid from -196°C to 350°C (-320°F to 662°F), see options in Part Number Code Ambient from -50°C to 80°C (-58°F to 176°F), optional up to 210°C (410°F)
Pressure Ratings	Up to 490 bar / 7107 psi - dependent upon material
Electrical Connection	Cable entry M25 x 1.5 (standard), M20 x 1.5, ½" NPT, ¾" NPT (optional) Max. cable length to remote RHE transmitter 30m / 98ft
Sensor Enclosure Materials	Stainless steel (standard), 316 stainless steel (optional) Epoxy coated aluminum terminal box (standard), 316 stainless steel terminal box (optional)
Enclosure Type	Protection class IP65 (standard); IP 66 / NEMA 4X (optional)
Wetted Materials	1.4571 (316Ti), 2.4602 (Alloy C22), 1.4410 (SuperDuplex) Seal material (manifold construction): PTFE Additional/customer specific materials available upon request
Process Connections	Nearly any - the RHEONIK AnyPipeFit Commitment . Consult factory for types/sizes not listed in this data sheet
Pressure Rating Compliance	Europe – PED: Module A2, Module B3.2+C2
Certifications and Approvals	ATEX / IECEx Approvals for zone 0, 1, 2 (suitably rated RHE transmitter required) North American Approvals for Class I, Div. 1, Groups ABCD (suitably rated RHE transmitter required) American Bureau of Shipping (ABS) Product Type Approval for use on marine vessels
Documentation, Testing and Inspection	All sensors are hydro tested, calibrated and supplied with a traceable calibration certificate. Customized calibration and testing services available
Project Documentation and QA, Services	Rheonik offers a full set of services for large and complex engineering projects. Typical services offered are, but not limited to: <ul style="list-style-type: none"> • Certificates of origin and conformity, mill certificates • Data books including WPAR, WQS, NDT, test & quality plans, functional testing, calibration procedures, customized packing, factory acceptance etc. • Start up and commissioning services on/offshore
Options	Enclosure heating for high temperature applications Cleaning for oxygen service Full service painting to project specifications – consult factory

* At Q_{nom} pressure drop across a parallel tube sensor will be approximately 1 bar (14 psi) for H₂O. Sensors can be operated at higher flow rates but pressure drop will be higher. Maximum recommended velocity (liquid) through the sensor is 15 m/s. Beyond this point, cavitation may occur. Q_{min} is the recommended lowest flow rate. Sensors will measure flow rates lower than Q_{min} , but uncertainty may increase beyond 0.5% of rate.

These flow rate and pressure drop statements relate to standard pressure tube sensor versions. Models with higher pressure ratings have increased wall thickness and will have higher pressure drops and lower Q_{nom} values.

Measurement Performance

Standard Calibration

A	0.5% Uncertainty ±0.5% uncertainty between Q_{nom} and Q_{min}
B	0.2% Uncertainty ±0.2% uncertainty between Q_{nom} and $Q_{0.2}$

Higher pressure units may have lower Q_{nom} values due to reduced tube ID

Goldline Calibration

G	0.15% Uncertainty ±0.15% uncertainty between Q_G and $(Q_G/10)$
---	---

Only for sensors with standard temperature and pressure range
Customized calibration services are available – consult factory

Low Flow Calibration

2	Low Flow Optimized Calibration ±0.2% uncertainty between Q_{min} and $(Q_{min} * 20)$ and ±0.6% uncertainty between Q_{min} and Q_{low}
---	---

Only for sensors with standard temperature and pressure range

Q_{nom}	3000 kg/min (6614 lb/min)
Q_{min}	60 kg/min (132.3 lb/min)
Q_G	1800 kg/min (3968 lb/min)
$Q_{0.2}$	100 kg/min (220.5 lb/min)
Q_{low}	45 kg/min (99.2 lb/min)

Select the calibration option (A,B,G,2) required and include in the overall part number

Density Calibration

N*	No Live Density Calibration
S	Standard +/- 0.005 kg/liter uncertainty between 500 and 1400 kg/m ³
D	Enhanced +/- 0.0025 kg/liter uncertainty between 500 and 1400 kg/m ³

For live volumetric flow, S or D calibration must be included in the part number and the sensor must be operated by an RHE with live density capability.

* Even with No Live Density Calibration, volumetric flow can still be calculated with an inferred density value based upon a manually entered norm density value and its temperature gradient.

Flow Measurement Repeatability

Standard ± 0.1% of rate
Goldline ± 0.05% of rate

Temperature Performance

Better than ±1°C

Calibration Reference Conditions

Performance statements relate to the following conditions:

- Water (for mass flow accuracy)
- Temperature: 18 to 24°C (66 to 76°F)
- Pressure at 1 to 3 barg (15 to 45 psig)
- RHM with standard temperature, material and pressure range

Measurement Tube Pressure Ratings

The maximum pressure (P_{max}) of a sensor is determined by its lowest rated part. The lowest rated part can be either the measurement tube (P_{max} indicated below), the construction type (P_{max} indicated in the Part Number Code section) or the process connection (for P_{max} see published standards or manufacturer information).

Pressure Code	Material Code	Material	Pmax					
			bar	psi	@	°C	°F	
P1 (std.)	M1 (std.)	1.4571 (316Ti) UNS S31635	104	1508	@	50	122

			214	3104	@	210	410	
			178	2582	@	350	662	

*Only with N1, NA, E2 temperature range (note Super Duplex min. temp. is -40°C) and seal-less construction type

Other Materials and Pressure Ratings

Higher pressure rated measurement tubes in the materials above may be possible. Other wetted materials (e.g. Inconel, Monel, 304 stainless steel, others) are also possible for chemical compatibility, lower pressure drop, abrasion allowance and other application specific requirements.

Contact factory with specification for assessment and availability.

Mechanical Construction

Seal-less design

PFO: parallel/dual path

Process Connection	Dim. L	Dim. H2	Order Code
	mm / in	mm / in	
ANSI 4" 150#RF Flange	725 / 28.54	1443 / 56.81	F1
ANSI 4" 300#RF Flange	725 / 28.54	1443 / 56.81	F2
ANSI 4" 600#RF Flange	725 / 28.54	1443 / 56.81	F3
ANSI 4" 900#RTJ Flange	900 / 35.43	1443 / 56.81	R0
ANSI 4" 1500#RTJ Flange	900 / 35.43	1443 / 56.81	R2
ANSI 4" 2500#RTJ Flange	900 / 35.43	1443 / 56.81	R3
DIN DN100/PN16 Flange	725 / 28.54	1443 / 56.81	D4
DIN DN100/PN40 Flange	725 / 28.54	1443 / 56.81	C1
DIN DN100/PN100 Flange	725 / 28.54	1443 / 56.81	C2

1. C2 and F3 flange selection will reduce maximum allowable measurement tube pressure rating by a factor of 0.73

Dimensions	mm	in
A1	910	35.83
A2	950	37.40
B1	150	5.91
B2	230	9.06
H1	1253	49.33
E	300	11.81
W	150	5.91

Standard blue terminal box in Aluminum, size = 125 x 80 x 57 mm (4.92 x 3.15 x 2.24 in)

- optionally available with integral RHE45 transmitter

Optional SS 316 box, size = 100 x 100 x 61 mm (3.94 x 3.94 x 2.40 in)

- only for remote transmitter

NOTE: Junction boxes are supplied with M25 x 1.5 cable entries as standard. M20 x 1.5, ½" NPT, ¾" NPT cable entries are optionally available and must be ordered separately.

All dimensions are for standard products. For customization of face to face length and/or process connection types other than the ones listed on this page, please consult factory. Note that larger diameter flange process connections are always possible.

Options and Accessories

RHM60L Part Number Option Codes	
H1	Hot oil/steam heating matrix for housing, DN25 PN40
H2	Hot oil/steam heating matrix for housing, 1" ANSI 150 RF
H3	Hot oil/steam heating matrix for housing, 1" ANSI 300 RF
P2	Housing purge connections - ½" NPT (2 pcs)
SB	Housing in 316 stainless steel
DY	Dye penetrant inspection
XR	X-ray test

NOTE: when specifying a sensor with multiple part code options (i.e. DY and XR), separate each code with a comma in the part string (i.e. ...DY,XR...)

Cable Entry Options (order separately)	
ORHM-E1	½" NPT Terminal Box Cable Entry
ORHM-E2	M20 x 1.5 Terminal Box Cable Entry
ORHM-E3	¾" NPT Terminal Box Cable Entry

Standard cable entry on terminal box is M25 x 1.5

Transmitter Range

Any Rheonik Mass Flow Transmitter model can be combined with any Rheonik Mass Flow Sensor to provide an overall mass flow measurement system to suit any requirement. Rheonik Coriolis transmitters are available in versions specifically designed for process, industrial and OEM applications. Together they offer a tremendous range of options for system designers and end users alike.

See separate data sheet for the features of each transmitter style

About Rheonik

Rheonik has a single purpose: to design and manufacture the very best Coriolis meters available. Our research and engineering resources are dedicated to finding new and better ways to provide cost effective accurate mass flow solutions. Our manufacturing group care for each and every meter we produce from raw materials all the way to shipping and our service and support group are available to help you specify, integrate, start-up and maintain each and every Rheonik meter you have in service. Whether you own just one meter or have hundreds, you will never be just another customer to us. You are our valued business partner.

Need a specific configuration for your plant - don't compromise with a "standard" product from elsewhere that will add extra cost to your installation. If we can't configure it from our extensive product range, our exclusive **AnyPipeFit Commitment** can have your flow sensor customized with any size or type process connection you need.

No matter what control system you use as the backbone in your enterprise, with our **AnyInterface Commitment**, you can be sure that connection and communication will not be a problem. Alongside a wide variety of discrete analog or digital signal connections, we can also provide just about any network/bus interface available (for example: HART, ProfibusDP, ProfiNet, EtherCAT, PowerLink, EtherNet/IP, CAN,) with our RHE4x family of transmitters. Rheonik RHE4X transmitters can connect to your system – no headache and no conversion needed.
